

Good for the environment.
Good for business.

WHAT IS SUSTAINABILITY? *Sustainable development meets the needs of the present without compromising the ability of future generations to meet their own needs.*

Products & Packaging

Sustainable Successes

Our line includes recyclable packaging materials such as paperboard, aluminum cans and steel.

100%
recyclable

Award-Winning Packaging Initiatives

Our Hunt's bottles are the only tabletop ketchup products on the market using a material that can be recycled for like-use plastic products.

Packaging Solutions

Our bag-in-box Wesson Oils are another example of efficient, sustainable packaging in ConAgra's line. While increasing the amount of renewable packaging we've reduced not only the non-renewable packaging usage, but also the disposed packaging material *and* volume sent to landfills.

87% less
volume to
landfills

We are committed to the on-going development of packaging options with more efficient use of materials.

Our commitment to sustainable practices.

ConAgra's vision considers impacts to economic, social and environmental issues. To deliver this vision, our strategy is to reduce ConAgra's impacts on the environment (and those of our supply chain, to the extent that we have influence) in three areas of focus: Energy/Carbon, Waste, and Water.

This commitment to sustainable practices not only protects the environment, but it saves money as well. And, in addition to being cost effective, being environmentally responsible also reflects highly on your company's reputation.

Greenhouse Gas Reduction

Extensive Efforts

Striving to protect the environment through energy efficient products and practices, we have taken inventory and now we are taking action, implementing greenhouse gas management programs to reduce consumption and increase efficiency. We participate in the following national, voluntary programs to measure and communicate our progress.

- Carbon Disclosure Project
- U.S. EPA's Climate Leaders Program
- U.S. EPA's Energy Star Program
- U.S. Climate Partnership Association

Transportation Efficiency

Reducing our Carbon Footprint

ConAgra Foods optimized our transportation portfolio to streamline diesel trucking routes while increasing intermodal transportation. Between June 2005 and December 2007, we achieved a reduction of 29 million miles and 4.8 million gallons of fuel compared to the previous time period. These savings represent an equivalent reduction of more than 48,000 metric tons of carbon.
